

Environmental Videographer Job Opening

The Utah Rivers Council seeks an Environmental Videographer with demonstrated experience in cinematography and we encourage film and environmental studies students at the University of Utah to apply.

Organizational Background

The Utah Rivers Council works to protect Utah's rivers and clean water sources for citizens and wildlife. The URC has had many successes in protecting Utah's rivers and promoting water conservation since 1995. More information on our work can be found by visiting www.utahrivers.org.

Job Duties

The Environmental Videographer will assist in the acquisition of video for the URC's video projects including helping to film interviews and collect video in the outdoors across Utah. This is a part-time, temporary position over the summer months with weekly hours varying between 10 and 35 hours per week, depending on availability. The student will gain a glimpse at how film is used by nonprofit and advocacy groups to affect environmental policy.

Skills Needed

Excellent organization skills, comfort with multi-tasking and an interest in water issues in Utah. Candidates must have experience using a modern video camera and be able to share video portfolio upon request. Experience with shot composition, HD videography, lighting concepts and practice, and other digital cinematography skills. Compensation dependent upon experience. All interested applicants should apply.

To apply

Send a cover letter explaining your interests and background, resume and direction about how to view your past video work. You may contact us at Hiring@utahrivers.org
